

Horizontale schaal 1/500
 Verticale schaal 1/500
 Referentievlak 5.30 mTAV

The diagram shows a longitudinal profile of a road section. The top part is a line graph with two series: a solid line for 'ontworpen toestand' (proposed state) and a dashed line for 'bestaande toestand' (existing state). The vertical axis represents elevation in meters TAW (mean sea level). The horizontal axis represents the road length. A dashed line indicates the drainage level at -Drain 200mm. The profile shows a series of peaks and valleys, with the proposed state generally higher than the existing state. The road is labeled 'in meter TAW' at the top left and 'aansluiting op PRL_BN_23_9' at the bottom left. The right side is labeled 'aansluiting op PRL_BN_24_6'.
